

# SUPPORTING COMPLEX MOBILE DEVICES: CONTENTS

•	About this paper	2
•	•	•
•	1 Executive Summary – facts and figures at a glance	5
•	•	•
•	2 Managing complex multi-tier support	6
•	2.1 Data support, a paradigm shift	6
•	2.2 Why have multiple tiers?	7
•	2.3 Multi-tier workflow and escalations	8
•	•	•
•	3 'Cost to serve' calculations	9
•	3.1 Customer care costs	9
•	3.1.1 Propensity to call (PTC) (see fig 3)	9
•	3.1.2 Escalation split (see fig 3)	9
•	3.1.3 Call handling time (see fig 3)	10
•	3.1.4 The Calculation	10
•	3.1.5 Propensity to call	10
•	3.1.6 Average call duration	10
•	3.1.7 Average call cost	10
•	3.1.8 Average cost per device by tier	10
•	3.2 Drawing observations from Cost-to-Serve analysis	10
•	3.3 What is the average cost of supporting a device?	11
•	3.3.1 Device Complexity	11
•	3.3.2 Supply Channel	11
•	3.3.3 User Segment	11
•	3.4 Using the WDSGlobal cost to serve calculator	13
•	3.5 No Fault Found Returns	14
•	3.5.1 So why are so many devices returned without fault?	14
•	3.5.2 Mitigating the 'No Fault Found' risk	15
•	•	•
•	4 Wireless Informatics and the cascade principle	16
•	4.1 Do technologies become less technical over time?	16
•	4.2 The Cascade Principle	16
•	•	•
•	5 Where do users go for support?	17
•	•	•
•	6 Migrating support traffic and the road to call avoidance	19
•	6.1 Is call avoidance the ultimate goal?	19
•	6.2 Drawing users into Web Self Care	20
•	6.3 Supporting the ardent DIY user / mitigating abandonment	20
•	6.3.1 Mobile Device Management / Unconscious Configuration	20
•	6.3.2 On-Device Support	21
•	•	•
•	7 What are the problems faced by users?	22
•	7.1 Analysis of problem categories	22
•	7.2 Analysis of frequently asked questions	22
•	•	•
•	8 Call handling and productivity refinement	23
•	8.1 How long do mobile technical support calls last?	23
•	8.2 Identifying root causes behind call handling inefficiency	23
•	8.2.1 How is time spent on a call?	24
•	8.3 Getting to the root-causes behind CHT inefficiency	25
•	8.3.1 Profiling inhibitors	25
•	8.3.2 Diagnostic skills deficiencies	26
•	8.3.3 Knowledge deficiencies (diagnostic and deployment phases)	27
•	8.3.4 Workstation usability and support content location	27
•	8.3.5 Deployment of the fix	27
•	•	•
•	9 The impact of Mobile Device Management on customer care	27
•	9.1 How many customer service problems does MDM truly address?	28
•	9.2 Does OMA DM technology replace OTA Client Provisioning?	28
•	9.3 The role of Wireless Informatics analytics in DM strategy	29
